Facts and Figures at a Glance

**Universidad Nacional Autónoma de México (UNAM)** has played a major role in the history and formation of our country. The fundamental tasks of this public and autonomous institution are teaching, research and the promotion of culture.

UNAM is one of the oldest institutions of higher education in America.
- On September 21, 1551, it was founded as the “Real y Pontificia Universidad de México”.
- In 1910 it was established as “Universidad Nacional de México”.
- In 1929 it obtained its autonomy and current official name.
- The Central University City Campus built between 1949 and 1952, received in 2007 the appointment as UNESCO’S world heritage2.
- The campus constitutes a unique example of 20th century modern architecture as it integrates urbanism, architecture, engineering, landscape design and fine arts with references to local traditions especially to Mexico’s pre-Hispanic past. In 2017 UNESCO made another recognition to the UNAM for its work of preserving the bibliographical heritage protected in the National Library of Mexico.

Research¹
- 4,598 UNAM academics are attached to the National System of Researchers.
- As a result of research in 2015, 3,249 specialized articles were published in refereed international magazines, 582 books and 1,093 books chapters.
- UNAM generates 30 percent of the research and scientific publications carried out in Mexico.

Scholarships
- In an effort to promote equality of opportunities, UNAM granted 194,000 scholarships during 2015-2016.

Cultural Dissemination
- Around 14,000 cultural activities were held within its facilities, with 2,980,000 spectators in 2015.

Nobel Laureates
- Alfonso García Robles won in 1982 for his work on the Non Proliferation of Nuclear Weapons.
- Octavio Paz was awarded in 1990 for his remarkable writings and sharp social essays.
- Mario Molina won in 1995 for his studies on the formation and decomposition of ozone.

### Infrastructure

- 2,812,786 m² square meters built.
- 2,183 buildings, 4,576 classrooms and 2,824 laboratories.
- 24 higher education schools and 14 high schools.
- 33 institutes, 16 centers and 9 research university programs
- 135 libraries (1,717,855 titles and 6,745,335 volumes).
- 26 museums and 18 historical sites.
- 51 sport disciplines with facilities suitable for each of them.
- Facilities in the 32 states.

### Campi

- The main campus is “Ciudad Universitaria”, it has 3 schools, 15 faculties, 7 centers and 27 institutes.
- 2,183 buildings, 4,576 classrooms and 2,824 laboratories.
- 24 higher education schools and 14 high schools.
- 33 institutes, 16 centers and 9 research university programs
- 135 libraries (1,717,855 titles and 6,745,335 volumes).
- 26 museums and 18 historical sites.
- 51 sport disciplines with facilities suitable for each of them.
- Facilities in the 32 states.
- Area 5 campi and 14 high school buildings.

### Metropolitan

- In Mexico 8 foreign offices.

### Internacional Presence

- Canada: Gatineau, QC  
- China: Beijing  
- Costa Rica: San Jose  
- England: London  
- France: Paris  
- Spain: Madrid  
- U.S.A: San Antonio, TX; Chicago, ILL; Los Angeles, CA; Seattle, WA; Tucson, AZ

### Students

- 349,539 students
  - High School: 33.6%  
  - Undergraduate: 58.3%  
  - Graduate: 8.1%

### Academic Staff

- 40,184 UNAM academics.

### Academic Programs

- 120 undergraduate programs  
- 41 graduate programs  
- 38 specialization programs.

### Operated Services and Sheltered Collections

### Cooperation and Mobility

- More than 141 agreements signed in 2015 with Higher Education Institutions world wide promoting student and faculty mobility as well as joint research projects.

### National

- 2,644 academics from the UNAM in other national institutions
- 634 scholars from other national institutions at UNAM
- 1,779 students of the UNAM in academic activities in the country
- 841 students from other national institutions at UNAM

### International

- 2,004 academics from the UNAM in abroad institutions
- 1,293 academics from the institutions from abroad at UNAM
- 3,404 students from UNAM abroad
- 6,347 foreign students at UNAM.

Teaching

UNAM offers more undergraduate and graduate studies than any other institution in Mexico: 3 high school systems, the National Preparatory School, the Science and Humanities School and Distance Education. 120 undergraduate programs in its different schools; 41 graduate programs and 38 specialties. Courses, conferences, seminars, roundtables, performances, tournaments, cultural activities, and open education are also offered.

In Mexico, it stands out as the university that trains the highest number of professionals, in a wide variety of fields of study. The syllabuses are evaluated systematically in order to adjust to the current demand in the global labor market.

Research and Innovation

UNAM has for its research activities 33 institutes, 16 centers and 9 university programs. Our researchers cover a wide spectrum of disciplines including energy, engineering, environmental sciences, genomic sciences, medicine, nanotechnologies, sustainable development and water. 30 percent of the research carried out in Mexico is generated by our institution and nationwide, 1 out of every 3 research publications is formulated by UNAM experts.

UNAM carries out more than 14,000 cultural activities every year, including festivals, music presentations, cinema, literature, dance and theater, among other artistic performances that have over 2 million spectators. Moreover, the university has more than 26 art and science museums, 18 historic sites and more than 400,000 music tapes, films, art pieces and recorded materials, which represents an invaluable contribution to Mexico's cultural enrichment.

Coordinations, Management Centers, Faculties and Institutes, have led to the proliferation of spaces for dance, theatrical, cinematographic and musical expression; there are spaces that support scientific research and creation. We open our doors every day for the community and the public in general.

**Cultural Mass Media**

UNAM’s cultural proposal also includes mass media and book editing that can be consulted at the UNAM libraries, webpage in this sense it has a television channel TV UNAM and a radio station RADIO UNAM. The University promotes culture, art, values, care and preservation of the environment.
Sports and Recreation

UNAM promotes physical activity and recreation among the members of its community as an important element for their physical, ethical and social development. To do this, the university works in specific areas: recreational activities, training and high performance sports.

The recreation activities offer services that help the community, students, academics and university workers, to enjoy their leisure time. The Physical Evaluation and General Fitness Training Program, the University Corridor for Physical Activation and Recreation, Gymnastics for Everyone, ‘Deporteca’ (a place where you can borrow sports equipment and board games), University Chess Club, the Physical Activation Fair and the bike loading stand out, among others.

Others important activities are Sport Medicine, Sport Library, Athletic Investigation and American Football. The Sports Training area is in charge of organizing tournaments and sports leagues. The High Performance area offers specialized attention and orientation to students whose athletic abilities, qualities and characteristics allow them to join the representative teams of UNAM.

Our institution has specialized infrastructure that allows the best practice of each one of the disciplines it offers. Therefore, it also allows the participation of people with some kind of physical disability through specialized training in modified infrastructure.

The Olympic Pool in the main campus is a sport compound that includes not only a pool for swimming competitions and diving, but also is a place for practicing water polo. It has spaces for recreational activities and courts for practicing others sports and also green areas.

National Presence

For undergraduate studies, the Main Campus has 18 entities (15 in CU and 3 in the metropolitan area). Also in the metropolitan area the UNAM has 5 Multidisciplinary Units. As a national institution, the UNAM has extended its presence throughout the Mexican Republic with different entities engaged in teaching and research, as well as services of public interest. Nowadays our University has 3 National Schools and 6 poles of regional development established in Baja California, Guanajuato, Michoacán, Morelos, Querétaro and Yucatán.

The Scientific Research and Humanities Coordinations are responsible for: 9 Programs (6 in C.U), 16 Centers (7 in C.U.) and 33 Institutes (27 in C.U.).

In addition, there are endless spaces created to acquire, expand and reinforce knowledge, such as: Foreign Offices, Laboratories, Divisions, Stations, Observatories, Museums, Historic Building, Ships and Offices in loan.

As a national institution, UNAM has presence in the 32 federal entities with spaces dedicated to various activities focused on teaching, research and dissemination in all areas of knowledge that represent us.

Numbers

- 102 National Seismological Service equipment for the recording of earthquakes distributed in 29 states of the Mexican Republic (the data stored are transmitted to the central facilities of the National Seismological Service in the main campus); we also have the Tacubaya Seismological Observatory (CDMX).
- More than 30 localities have instalations of the National Mareografic Network.
- 3 National Astronomical Observatories where the UNAM participates in: San Pedro Mártir (Baja California), Tonanzintla (Puebla) and Cerro de la Virgen (Zacatecas). In addition, there is the Laboratory of the Large Millimeter Telescope in the Sierra Negra (Puebla).
- 36 Headquarters of the Continuing, Open and Distance Education, distributed in 9 states of the Mexican Republic for the Open University System and Distance Education. In this modality, 19 degrees are offered.
- 34 National Laboratories in which the University participates representing 40 percent of all the existing ones in Mexico.
- 2 Oceanographic vessels: “El Puma” and “Justo Sierra” investigating areas of the Pacific, Caribbean, Gulf of Mexico and California.
The presence of UNAM in Mexico City and its Metropolitan Area has contributed to spread the benefits of excellent education and research, as well as cultural promotion. This way, thousands of young people find a place to carry on with their high school and higher education studies and scientists from diverse fields can develop new knowledge, and investigation, so the world may have the opportunity to enjoy a varied and high quality artistic, scientific and humanistic offering.

- Zaragoza Faculty of Higher Education (11)
- Faculty of Music (12)*

*They are located within the ZMVM, outside the central campus and they depend from the main campus.
Health Services

The main campus has important medical services that benefit society and the university community, such as those offered at the University Medical Center¹ (CMU) where there are general medical services and some specialties. The High Specialty Medical Care Unit (UAMAE) provides specialized medical care through three clinics: Sleep Disorders, Preventive Care of the Traveler (CAPV) and Oncodermatology. The Faculty of Psychology is responsible for specialized centers and programs that deal with psychological illnesses: addictive behaviors, human sexuality and victims of natural and socio-organizational disasters. The Faculty of Dentistry in addition to giving attention in its facilities, has nine Peripheral Clinics distributed in Mexico City.

This services promote self-care, prevention and early detection. They involve students who have completed their undergraduate studies and teachers who function as the responsible authority. It is worth mentioning that all UNAM Campuses have medical and psychological care.

The Faculty of Higher Education Iztacala² (FESI) created the University Clinic of Integral Health (CUSI). There are 8 clinics (Acatlán, Almaráz, Aragón, Cuautepec, Cuautitlán, Ecatepec, Iztacala, Molinito) where they offer general medicine, optometry, psychology and laboratory studies.

As an extension of its classrooms for the benefit of teaching, learning and research, FES Zaragoza³ has 8 University Health Care Clinics where the students strengthen their knowledge, skills and professional abilities, under the close supervision and action of academics from different disciplines: Medicine, Dentistry, Nursing, Psychology and Pharmaceutical Chemist Biologist.

The Veterinary Medicine and Animal Science (MVZ) in the main campus is in charge of the Veterinary Hospital of Specialties. MVZ’s career at FES Cuautitlán⁴ offers surgical and technological care in Equine and Small Species.

There are other services that also benefit the health, such as those that offer the career of Biology with the care, maintenance and research that is done in the Herbarium, Botanical Garden and Vivarium.

Internationalization in UNAM

Internationalization, as a fundamental axis for the scientific, humanistic, academic and cultural development of the UNAM, is included in the Institutional Development Plan 2015-2019. International policies in research, education and academic and cultural collaboration promote the development of society, as one of the main commitments of this house of studies.

Since the founding of the National University in 1910, there is an academic correlation with other institutions Dean José Vasconcelos, with the aim of “… universalizing knowledge about the Spanish language and Mexican culture, as well as academically supporting Mexican communities abroad”; This School is the now known as Center of Education for Foreigners (CEPE).

Over the decades, the presence of the university abroad has grown strategically with the following offices:

- UNAM-San Antonio
- UNAM-Canada
- UNAM-Chicago
- UNAM-Los Angeles
- UNAM-China
- UNAM-Seattle
- UNAM-Spain
- UNAM-Costa Rica
- UNAM-France
- UNAM-United Kingdom
- UNAM-Tucson

With the purpose of organizing and integrating the institutional efforts to allow the strengthening of the international impact of the University, in addition to the presence of the UNAM in other latitudes, International Offices were created in different periods:

- 1955 Office of Cultural Exchange and Scholarships
- 1961 Department of Cultural Exchange, Public Relations and Scholarships
- 1970 Scholarship and Academic Exchange Commissions
- 1977 General Direction of Academic Exchange
- 2000 Office of Interinstitutional Collaboration
- 2009 Office for Cooperation and International Affairs (DGECI)

The increasing presence of the UNAM, as well as its resulting relations with international Higher Education Institutions, led to the creation in 2015 of the Head Office of International Affairs (CRAI), committed to consolidate internationalization, strengthen alliances, and coordinate policies and actions for the benefit of the university community.
